Hua Loo-Keng Prize of Mathematics

Introduction

Professor Loo-Keng HUA is a famous Chinese mathematician. He loves his motherland deeply, dedicated to science, and made outstanding contributions to developing mathematics career and cultivating talents in his lifetime. In order to cherish the great achievements of Professor Loo-Keng HUA, also encourage mathematicians who made contributions to the development of Chinese mathematics careers, as well as stimulate the development of mathematics of our country, the Chinese Mathematical Society together with Hunan Education Publishing House decided to set up "Hua Loo-Keng Prize of Mathematics".

The "Hua Loo-Keng Prize of Mathematics" was set up together by the Chinese Mathematical Society and Hunan Education Publishing House. Hunan Education Publishing House has been enthusiastic in promoting the mathematics career of our country, and sponsors the award. The Chinese Mathematical Society is responsible for deciding and awarding winners. The Prize Committee was decided and made up by the executive council of the Chinese Mathematical Society, its members are composed of president and vice presidents, secretary general and individual experts of the Chinese Mathematical Society, and they are all well-known mathematicians. The council of Chinese Mathematical Society changes every four years, and members of the Prize Committee will be re-decided afterwards.

"Hua Loo-Keng Prize of Mathematics", since it set up in 1992, has been held for 14 consecutive sessions. At most two Chinese mathematicians will be awarded in every session, and the reward is 100,000 yuan. An award ceremony will be held after the winners have been decided. National leaders (such as the NPC standing Committee Vice Chairman Guangzhao ZHOU, Shisun QIAN, etc.) will be invited to participate in the award ceremony. At the same time, the award ceremony will be reported and propagandized through the news media, to increase the influence of the "Hua Loo-Keng Prize of Mathematics" among both domestic and international mathematical community.
